EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard Michaud (Reg. No. 40,088) on April 4, 2005.

2. The application has been amended as follows: Claims 20 and 21 have been cancelled.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: The claims are allowable because the prior art fails to teach a method of manufacturing a razor cartridge wherein a body is formed with channels aft and forward of the razor blade, shaving aid material is injected into the channels, and passages between the channels allow the shaving aid material to travel as set forth in claims 1, 14, and 15.

Regarding claims 1, 14, and 15, Welsh et al (4,964,214) disclose a method for manufacturing a razor blade cartridge, comprising the steps of: providing one or more razor blades (2), each having a length; forming a body (1B) attached to the one or more razor blades, wherein the body (1B) includes a first channel aft of the one or more razor blades (2), a second channel forward of the one or more razor blades (2), and one or more passages extending between the first channel and the second channel; placing a shaving aid material (28) into at least one of the first channel, second channel, or the

one or more passages. See FIG 12. Welsh et al fail to disclose injecting the shaving aid material. Schauble (4,809,432) discloses a method for manufacturing a razor blade cartridge (14), comprising the steps of: providing one or more razor blades (42), each having a length; forming a body attached to the one or more razor blades, wherein the body includes a first channel (48) and a second channel (54), and one or more passages (26) extending between the first channel (48) and the second channel (54); placing a shaving aid material into at least one of the first channel (48), second channel (54), or the one or more passages (26); wherein the one or more passages (26) extending between the first channel (48) and the second channel (54) enables the shaving aid material to travel from the one of the first channel (48), the second channel (54), or the one or more passages (26) into the others of the first channel (48), the second channel (54), or the one or more passages (26). Schauble fails to disclose the first channel is aft the razor blade, and the second channel is forward the razor blade. It would not have been obvious to one of ordinary skill in the art at the time the invention was made to combine the Welsh et al and Schauble devices because the Welsh et al device concerns a solid shaving preparation, whereas the Schauble device concerns a liquid shaving preparation.

The above prior art by itself or in combination with the other prior art cited fails to teach the claimed invention set forth in claims 1, 14, and 15.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
